

STILPHŌS

|MODULAR|SHELVING|SYSTEM|

STÍLI PHŌS

Stíli Phōs è un concetto

che permette di creare e organizzare spazi contenitivi pensati per ogni zona della nostra casa, dalle composizioni libreria alle cabine armadio. È un sistema flessibile e versatile che, grazie a materiali e finiture, si adatta ad ogni esigenza di spazio, offrendo la massima personalizzazione ed espressione del proprio gusto estetico. Gli elementi che compongono Stíli Phōs sono liberamente posizionabili nelle quantità ed altezze desiderate: il fulcro del progetto è il sistema di aggancio di questi elementi al montante in alluminio che risulta privo di forature o agganci fissi, lasciando quindi una totale libertà compositiva. Stíli Phōs è caratterizzato da un design minimalista e dalla estrema facilità di montaggio: il sistema di fissaggio degli elementi che lo compongono quali ripiani, cassettiere, contenitori, consente di posizionarli alle altezze desiderate semplicemente utilizzando una chiave ed un cacciavite. La sua versatilità è espressa inoltre dalla possibilità di fissarlo con profili da terra a soffitto e quella con profili da terra a parete.

Stíli Phōs is a concept

that allows you to create and organize storage spaces in your house from library compositions to walk-in closets. It is a flexible and versatile system, able to adapt to any space requirements and due to the materials and elegant finishes it allows the maximum aesthetic customization. The parts that compose Stíli Phōs are freely positionable in terms of quantities and desired heights. The key element of the project is a coupling system without holes or fixed hooks together with an aluminium profile allowing you a total freedom of composition. Stíli Phōs is featured by a minimalistic design and an easy assembly: the fixing system of the shelf, drawer and divider elements makes it possible to flexibly place the individual components as desired by simply using a screwdriver and a wrench. Its versatility is also expressed by the two possible compositions: the version of the structure with ceiling-high profiles and the one with floor-to-wall profiles.

Stack of books on the top left shelf.

Stack of books on the top middle shelf.

Stack of books on the top right shelf.

Books on the second shelf from the top left, including titles like "ARCHITECTURE IN MODERN" and "667-9999".

Books on the second shelf from the top middle, including titles like "HADID" and "MODERN WOMEN".

Books on the second shelf from the top right, including titles like "NEW YORK" and "THE FUNDAMENTALS".

Books on the third shelf from the top left.

Stack of books on the fifth shelf from the top left, including titles like "LOST FISH" and "ALEXEY BRODOVICH".

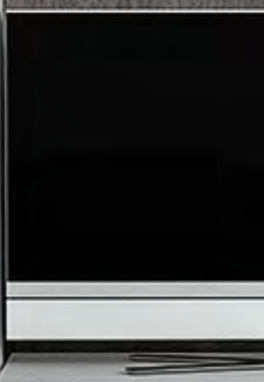

Stack of books on the fifth shelf from the top middle.

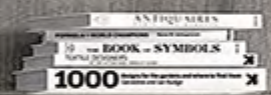

Stack of books on the fifth shelf from the top right.

Stack of books on the sixth shelf from the top left, including titles like "The Refraction of the Self".

Stack of books on the seventh shelf from the top middle, including titles like "A SMILE THE MIND".

STILI PHŌS

a soffitto

In un contesto residenziale Stili Phōs a soffitto può essere utilizzato nella zona notte come cabina armadio, nella zona living quale parete attrezzata o libreria oppure utilizzato come divisorio, elemento filtro tra 2 ambienti diversi. Il rinforzo centrale (opzionale) utilizzato quale collegamento tra la parete muraria ed il montante strutturale verticale serve per dare a tutta la struttura una maggiore rigidità e solidità.

Per la composizione **Stili Phōs a soffitto** sono necessari:

- Elemento portante verticale (profilo con schermo diffusore LED)
- Elemento di regolazione (puntale e piedino livellatore)
- Elemento di rinforzo centrale
- Elementi di fissaggio degli accessori

floor to ceiling

In residential context Stili Phōs floor to ceiling can be used in the sleeping area as walk-in closet, in the living area as a fitted wall or library or as a room partition between two different spaces. The middle reinforcement (optional) can be utilized as a connection between the wall and the vertical structure which gives the whole construction a greater rigidity and solidity.

For **Stili Phōs floor to ceiling** composition you need:

- Vertical components (profile and LED shield)*
- Adjustment elements (cap and leg)*
- Middle reinforcement element*
- Fixing supplies*

STILI PHŌS

a parete

In un contesto residenziale Stili Phōs a parete può essere impiegato nella zona notte (cabina armadio) oppure nella zona living quale parete attrezzata/libreria. Il rinforzo centrale utilizzato quale collegamento tra la parete muraria ed il montante strutturale verticale serve per dare a tutta la struttura una maggiore rigidità e solidità. In un contesto invece commerciale o direzionale, Stili a parete può essere utilizzato ad esempio quale scaffalatura per esposizione prodotti (negozi) o per archiviazione (uffici).

Per la composizione **Stili Phōs a parete** sono necessari:

- Elemento portante verticale (profilo con schermo diffusore LED)
- Elemento di regolazione (puntale e piedino livellatore)
- Elemento di raccordo orizzontale
- Elementi di fissaggio degli accessori

floor to wall

In residential context Stili Phōs floor to wall can be used in the sleeping area (walk-in closet), in the living area as a fitted wall/library or as a room partition between two different spaces. The middle reinforcement (optional) can be utilized as a connection between the wall and the vertical structure which gives the whole construction a greater rigidity and solidity. In a commercial or directional context “floor to wall” offers a variety of possibilities and can be used for e.g. product exposition in shops or storage shelves in offices.

For **Stili Phōs floor to wall** composition you need:

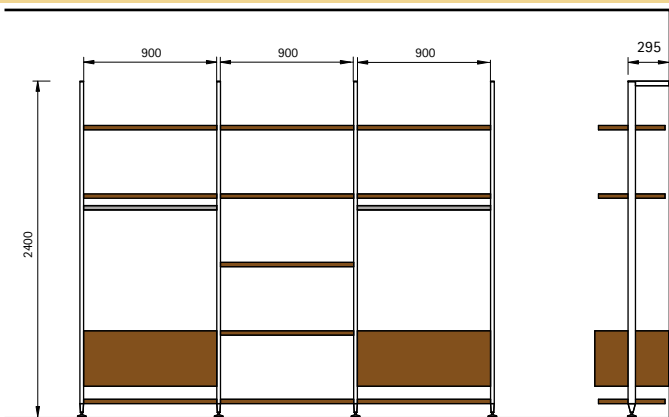

- Vertical components (profile and LED shield)*
- Adjustment elements (cap and leg)*
- Horizontal coupling element*
- Fixing supplies*
